Wow what does weakauras do. Not in moonkin form weakaura. Does elvui have weakauras.

This is my standard Power bar that I use with all of my classes and specs. It changes color properly as you switch and displays the value in the middle. It also conditionally resizes itself for a smaller mana bar ONLY when in moonkin form in order to better fit my Balance Weak Aura settl's default position will work with all of my WeakAura strings developed on the new version of WeakAurasMade using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Power Bar (wago.io)This is my combo points set that will automatically load for rogues and druids in cat form. These sit right atop my All Classes - Power Bar by default and both are designed to work with my feral DPS weak aura set.Made using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Combo Points (wago.io)This weak aura will show an icon for all of your classes interrupts anchored to the right of the target castbar.By default, this is anchored to quartz castbar. You will have to change the name of that frame if you are not using the quartz castbar addon. To do this, click on the group itself>Group>Position Settings>Frame>Change the name to the frame name of your castbar. If you don't know how to do this, simply cast something nice and long, like a hearthstone, click the "choose" button, and click on the castbar. Everything should work after doing that!This should work for all specs. I may be missing a few but you should be able to duplicate and change the name of the spell in the trigger to add additional ones.Made using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Interrupts on Castbar (wago.io)I have this dynamic group to show buffs that I care about for snapshotting, or defensives. I have added a bunch in that I'm currently using, feel free to use this as a template. It will not be fully functional for every class, but You can duplicate and modify these to your liking.Made using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Snapshot Buffs (wago.io)This is a dynamic group of progress bars for Trinket and other misc. Internal Cooldowns. This is anchored to my Snapshot Buffs dynamic group: way the ICD's will always be above your buffs so you can see if things are going to line up easily! This is not a complete list of buffs or trinket procs by any means, but you can use it as a template and duplicate the auras to add your own!Made using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Snapshot ICD's (wago.io)Actionbar including castbar and attack swing timers for bosses/target/focus. This can be especially useful for healers to pre-cast and know when damage is coming. Thank you to Carbine for sharing this!Link: Wago.io for RdepaTotem Timer for shaman by Löwen.Made using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Link: Totem Timer (wago.io)This is a health bar for blood DK's, can also be very useful for healers to see what the blood shield looks like on the tank.The Red + Orange = Healthpoints and the Orange + Yellow = Blood ShieldMade using WeakAuras 3.2 made for apollo 3 and requires that version to work fully. Download: Blood DK Health Bar (uploaded by Dibs)This WeakAura allows you to keep track of your cursor and also adds a ton of functionality to it. You can see a radial cast bar and GCD right on your cursor, AND it's visible while you are holding down the Right Mouse Button.It was not designed for 4.3.4 however, most of the features seem to work fine!Download: Ultimate Mouse Cursor (Wago.io) Simply browse for your screenshot using the form below. Screenshots containing UI elements are generally declined on sight, the same goes for screenshots from the modelviewer or character selection screen. The higher the quality the better! Please review our Screenshot Guidelines before submitting! Simply type the URL of the video in the form below. Humor / MemeThat's one way to remind you your not in Moonkin form.(i.redd.it)602 points603 points604 points submitted 1 year ago by DriftyMcDrift November 21, 2020 Boomkin Druid Weak Auras v1.0 Hi there guys. I'd like to introduce myself before explaining what I'm about to share. I'm Lunminas, a Disco Priest main from the guild, I've been playing on Warmane for around 3 to 4 years now with some experience on retail. This Weak Auras was made in attempt to fulfill something that's been missing from the contemporary Wrath of the Lich King community: New and updated User Interfaces. This project is essentially a start to make the 3.3.5a experience inherit some of the best improvements from retail content. Taking into consideration that Weak Auras 2 has been updated in August to be compatible with a plethora of components from the original retail addon, it's now possible to develop clean, functional UIs on it's new 2.18 build, with added effects, conditionals, triggers, etc. With this, I'd like to share my WA Import, but do realize that this does not work with old version of Weak Auras. If you're unsure where to download the new version, check for Bunny67's Weak Aura 2 Github repository. The build should be there. Without further ado, here's the UI, click on the image for a GIF. Features There's one main group and 3 other groups linked to the main one for this UI, they are separated in order to keep things organized. All the dynamic groups are dynamic for a reason, you won't see the UI this clogged, the screenshot shows all icons for all groups. The Main Rotation group displays your most used abilities and resources. It tracks your current eclipse, displaying it's cooldown, duration and current haste %. There's trackers for Insect Swarm, Moonfire and your main cooldowns. They all have special effects for certain conditions, such as cooldowns glowing when they're about to be ready again. The Upper Group shows useful things such as engineering gloves, Faerie Fire and Mark of the Wild. They track their cooldowns, uptime and missing auras. The Bottom Group is there for miscellaneous and otherwise not constantly used abilities. Also, there's a Cyclone tracker which displays which target you have cycloned and it's duration on the target. The Left Group is for your utility. There's a form, Innervate and Rebirth Tracker. The Right Group displays your defensives and some other useful abilities. They all glow once the aura is up and display it's cooldown. Things to note This UI has certain common characteristics, such as displaying important rotation abilities and cooldowns with glowing effects for high priority purposes and also cooldowns with a desaturated textures so you know what's not to be used. Important abilities also display unique effects when they're about to be off cooldown once again. Comments on the UI This UI is actually pretty different from the others on the back-end side of things. It uses different auras for wether or not the ability is on CD. This was done to solve an issue with the current version of Weak Auras which overwrites the "desaturate" option from a condition. So avoiding desaturation through conditions solves the issue but clogs the groups. This isn't relevant for performance, just aesthetics. WARNING Please do take note that this Import only works on version 2.18 of Weak Auras(Bunny67's), and also that resizing the original UI is done through the Main Rotation group, simply go to Paladin Rotations, group, Group Scale. Import As I said, this build is separated in 4 groups so we can keep it organized and modular. If there's things you don't want in your UI apart from the main rotation, you can simply not download it and it'll work just fine, also, the pastebin links can be changed easily, so if there's a new build, check the changelog and understand that it's already updated. With that being said, here are the links: 1. Boomkin Druid (Main Rotation) 2. Boomkin Druid (Upper Group) 3. Boomkin Druid (Left Group) 4. Boomkin Druid (Right Group) More of my UIs Did you like my UI? Please, make sure to check the rest! I'm attempting to make UIs for all classes. If you are interested, please check out this project's main thread for more. Changelog v1.0 (20/11/2020) - Released v1.1 (21/11/2020) - Fixed groups not resizing/moving with main group. Edited: November 21, 2020 November 27, 2020 All the pastebin link look dead (?) November 27, 2020 All the pastebin link look dead (?) All links are working February 1, 2021 Thanks for sharing, it looks a lot better than anything I could ever come up with! I must say though that there is a little bug in the main rotation section. If there are multiple booms in the raid it will show moonfire and insect swarm from other booms aswell. Switched those triggers to "own only" and it should be fixed now :) February 1, 2021 Also in the upper section. Why do you have it set that you get notified when its not YOUR motw/gotw? Any other druids motw/gotw should be fine too :D so i changed "own only" in that trigger to anyone. (wasnt able to edit my other post..) February 20, 2021 Used it for around a week, its great and thank you for sharing! March 22, 2021 How do I create an Eclipse Cooldown with this weakauras version? September 15, 2021 Hi i'm russian boomkin druid 55 lv and your weak auras dont work. Can you help me? after importing, the aura is added to the "not loaded" section. How can I load the aura on my lvl? or the problem is in the Russian client ? I recommend downloading Curse Client which is a program for your computer which makes it easier for you to download new addons and keep them up to date. Addons Useful moonkin addons: WeakAuras 2 - Track your trinket procs, other procs, CDs etc Other useful addons: ElvUI - Addon package with everything you need and more Deadly Boss Mods - Warnings and timers for raid bosses Skada or Recount - Damage meter MikScrollingBattleText - Combat text RSA - Raeli's Spell Announcer - Announces spells TimeToDie - Estimated time until current target will die TipTac - Tool tip addon shows name, guild, spec, class, health, target etc Auctionator - Simple but useful AH addon TradeSkillMaster + extra modules - Advanced AH addon with extra modules Bagnoon - Merges all bags and coloring items based on quality Mapster - Simple world map enhancement addon Postal - Enhanced mailbox support, loot all items at once Garrison Mission Manager - Helps you find the best team for your missions Master Plan - Modifies the missions UI, making it easier to figure out what you want to do Premade Filter - Tool to filter LFG search results. PvP addons: BattlegroundTargets - Shows battleground enemies with health, name, spec, class etc Killshot and Killshot Sounds - Plays a sound on your killing blows in PvP Macros Cast Starfall at cursor #showtooltip /cast [@cursor] Starfall Rebirth #showtooltip Rebirth /cast [@mouseover,help]Rebirth;Rebirth Remove Corruption #showtooltip Remove Corruption /cast [target=mouseover, exists]Remove Corruption;Remove Corruption Mouse over focus target /focus [@mouseover,exists]] Celestial Alignment + Berserking + second trinket #showtooltip /cast Celestial Alignment /cast Berserking /use 14

May 31, 2022 - Created by , the Astral Power pro bar weakaura is the quintessential weakaura for all balance players. This weakaura contains icons for all talent rows, and in addition to that, it contains a bar that tracks your resource, Astral Power. Just any general Astral Power bar works, but this is the one I am using for Shadowlands and you need all 3 ... May 31, 2022 - Very useful Weakaura for AOE Frenzy Fillers; Balance Druid Abilities Damaging Abilities. ... It is a little strange that your Moonkin Form aura does not show while in soulshape, however as soon as you cast a spell, or soulshape ends, you are returned to the form you started soulshape from. So there are 0 globals to get back into Moonkin Form. May 31, 2022 - Created by , the Astral Power pro bar weakaura is the quintessential weakaura for all balance players.
